Circular

Cir. No: 02/CCE –NAAC/OSD-QI/ASAR&AADPI/2024   Date:24-06-2024.

Sub: APCCE – Submission of **AADPI** by Principals for the Academic Years 2022-2023 & 2023-2024 – Certain Instructions Issued - Reg.

***

To maintain standards in Universities and Colleges, UGC issued regulations in 2010 prescribing detailed guidelines on Annual/Academic Performance Indicators (API)and Performance Based Appraisal System (PBAS). Under Academic Performance Indicators (API), points have been allocated for various activities of the teachers to improve the academic standards, accountability and create a work culture in the colleges.

Similarly, **AADPI** format **(Academic, Administrative and Development Performance Indicator)** proposed to be collected from Principals of GDCs & PACs for the Academic Years 2022-2023 & 2023-2024 is revised in a quantifiable way as per the UGC&NEP guidelines. The suggestions made by the members of the Committee have been incorporated and the approved AADPI format is here with circulated.

The principals of the Government Degree colleges and Private Aided Colleges are informed to submit the AADPI with relevant evidences to the RJDCE of the concerned Zone. The RJDCEs after verifying the data submitted by the principal will evaluate and upload the score on the CCE website through RJDCE login.

The AADPI is to be submitted for the Academic Year 2022-2023, starting from 1ˢᵗ June 2022 to 31ˢᵗ May 2023 and for the Academic Year 2023-2024, starting from 1st June 2023 to 31st May 2024. The Principals are requested to submit the AADPI to the RDCEs of their Zones concerned by 05-07-2024 and the RJDCEs have to upload the data on the CCE Website by 16ᵗʰ July 2024 without fail.

Sd/- Dr. Pola Bhaskar IAS.,

Various measures have been taken up during the academic year 2022-23 to improve the student enrolment

1.1.1 ENROLLMENT DRIVE

The enrollment campaign was conducted with the Principals of Puttur's feeder Junior Colleges, who were asked to inform, motivate, and inspire their students to choose the college's contemporary progressive marketable UG courses. College instructors adopted various feeding junior colleges and held enrollment drives throughout the year. Pamphlets were supplied to students, and posters were displayed at strategic locations such as bus stops and crossroads to showcase the college's services and infrastructure. The college has links to government and unaided junior colleges. We also enlisted the help of our students in spreading the word throughout their communities.

1.4.1   MINUTES OF STAFF COUNCIL

Recognizing the importance of maintaining academic integrity, fairness, and consistency in internal examinations, the Staff Council has met at Principal chamber on 8/08/2023 at 10.30 am and deliberated on and adopted the following resolutions to ensure that all examinations are conducted in a standardized and transparent manner.

Resolution 1: Examination Schedule: All internal examinations shall be scheduled as per academic calendar and communicated to staff and students at least four weeks in advance. Any changes to the examination schedule must be communicated immediately and be justified with valid reasons.

Resolution 2: Examination Format and Content: The format and content of internal examinations shall align with the learning objectives and outcomes of the respective courses. The Midterm exam question papers shall be submitted to Academic coordinator well in advance for printing

Resolution 3: Printing of answer sheets for Midterm examinations: It has been resolved to print 2 pages formatted exam papers from this academic year on words

Resolution 4: Examination Conduct and Invigilation: A standardized code of conduct for examination invigilation shall be established and provided to all invigilators. Invigilators are responsible for ensuring a fair and distraction-free environment during examinations.

Resolution 4: Academic Integrity: Clear guidelines on academic integrity and the consequences of cheating or plagiarism shall be communicated to all students prior to examinations. Any incidents of academic dishonesty shall be documented and reported immediately, and appropriate disciplinary actions shall be taken.

Resolution 5: Provision for Scribe: It has been resolved to provide a scribe for disabled students**.** Requests for scribe must be submitted and reviewed at least two weeks prior to the examination date.

Resolution 6: Pursuing of Mid exam results in Mentor mentee interaction: It has been resolved to discuss Midterm Examination results in the upcoming Mentor-Mentee interaction. Constructive feedback shall be provided to students to support their learning and improvement.

Resolution 7: Remedial coaching to support to Poor learners: It has been resolved to conduct remedial coaching for Poor learners two weeks before the Semester End examinations

1.4.5A. INITIATING SUITABLE ACTIVITY FOR ENHANCING THE PERFORMANCE

Each class is separated into three categories based on midterm and previous year exam performance: advanced, moderate, and slow learners.
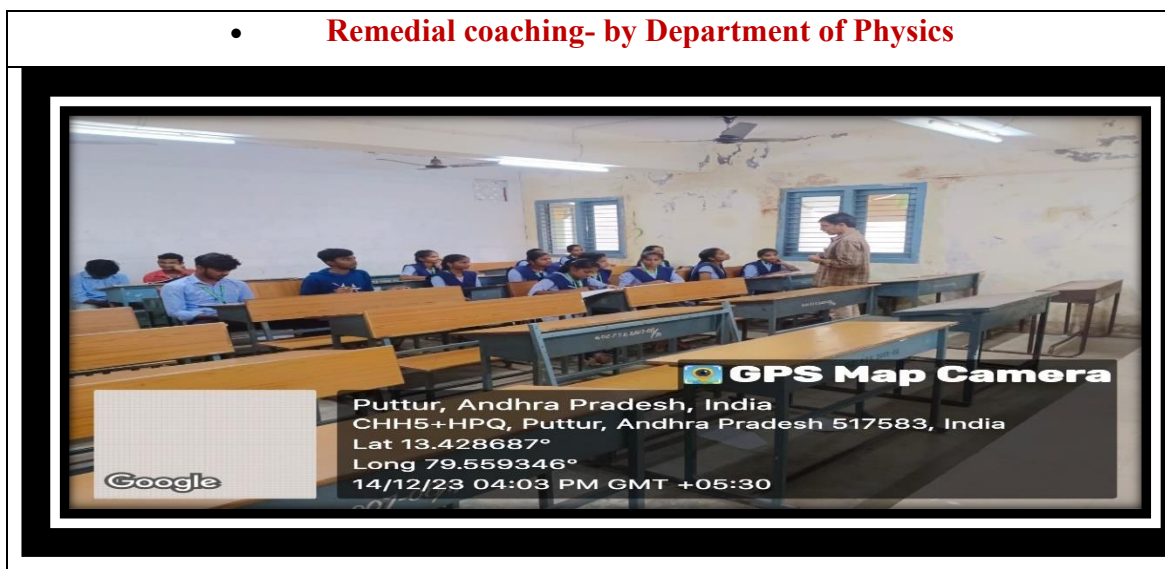

To support slow learners and help them achieve better marks or grades, remedial classes and study hours were conducted during the following periods: from 11.12.2023 to 23.12.2023 for the odd semesters, and from 22.04.2024 to 30.04.2024 for the even semesters. These classes provided students with additional opportunities for studying and clarifying doubts under the supervision of lecturers.

Brief Report:

Remedial classes and study hours are held daily during the Zero and sixth period, from 9 to 5 a.m and 4 to 5 p.m., to achieve the aforementioned goals.

- To ensure regularity, a distinct timetable is created for each class and lecturer.
- Four Remedial Class In-charges are appointed for the four wings: B.Sc-Maths, B.Sc-Biology, B.Com, and B.A. Each in-charge regularly monitors and oversees attendance and classroom activities in their respective wings.
- Lecturers addressed concerns, led study sessions, taught challenging topics, and administered slip tests or revision tests. These activities helped students better understand the subjects and provided them with opportunities to ask questions and receive clarification

TEACHING NOTES

Subject / Paper	physics paper III "Heat and Thermodynamics
Name of the Topic	Kinetic Theory of Gases
Hours Required	12 H
Learning Objectives	Maxwell's law of distribution of molecular speeds dammert experiment mean free path, Transport Phenomena
Previous knowledge to be reminded	Macroscopic properties like temp, vol & pressure of gas and microscopic properties like speed momentum of gases

Synopsis : Kinetic theory of gases was developed by Maxwell, clausius and others in explaining the behaviour of gases satisfactorily. The postulates of Kinetic theory of gases are as follows:

1. All the gases are made up of molecules which are considered to be rigid, perfectly elastic and identical in all respects.

2. The molecules are in random motion with all the possible speeds in all directions

3. Molecules in random motion collide with one another and walls of the container. The intermolecular forces between the molecules are neglected

4. The collisions are perfectly elastic and there is no loss of Kinetic energy during a collision.

5. The average distance travelled by a molecule between two collisions is known as its mean free path.

On the basis of Kinetic theory of gases, the pressure exerted by the gas is

$$P = \frac{2}{3} (KE \text{ of molecule})$$

An analysis of food culture and identity maintenance among second-generation Indian Americans

Dr.Kumara Sridevi
Lecturer in English ,
Govt.Degree College, Puttur,Andhra Pradesh, India

Abstract:

This study explores the complex correlation between food culture and the maintenance of cultural identity among second-generation Indian Americans residing in the United States. The study examines the influence of food practices on the development of identity, focusing on gender dynamics, acculturation, and the effect of social media on the construction of culinary traditions. Utilizing various study approaches and literature, the results demonstrate the crucial significance of food in maintaining connections to cultural tradition. The study focuses on the complex process of negotiating identity through culinary alterations. It emphasizes the dynamic relationship between cultural history, acculturation, and the transforming impact of food traditions throughout generations within the diasporic community.

CHRONICLE	ABSTRACT
Article history: Received December 25, 2022 Received in revised form June 2, 2023 Accepted June 14, 2023 Available online June 14, 2023 Keywords: Mn/Mg nanoparticles Anionic Surfactant AO7-Degradation Visible light Photoluminescence	In this research, the photocatalytic effect was studied for sol-gel synthesized Mn/Mg co-doped metal oxide (TiO_2) nanoparticles (NPs), which are encapsulated with anionic Gemini surfactant. The physicochemical properties of Mn/Mg co-doped TiO_2 were investigated using a variety of characterization techniques, FT-IR, UV Vis-DRS, XRD, SEM, EDX, TEM, BET and PL. Characterization results reveal that Mn/Mg dopants stabilize TiO_2 in the form of anatase phase and reduce the bandgap energy. Presence of strong chemical bonding and functional groups at the interface of dopant and TiO_2 NPs was confirmed with FT-IR. The photocatalytic activity of these catalysts was assessed by the degradation of Orange II (AO7) using visible light irradiation. Of the variable nanomaterials MMT5-GS2 showed remarkable results. The photoluminescence studies revealed that OH radicals are the reactive species and responsible for oxidative photocatalytic degradation of Orange II.

1. Introduction

During recent years numerous hazardous persistent organic contaminants have been discharging into the environment due to widespread intensive industrial activities which are capable of penetration deep into the soil and reaching groundwater due to their chemical stability, sufficient water solubility and resistance to biodegradation. Hence, it is essential to remove these chemically stable and persistent organic pollutants from contaminated water. But ensuring the safety of applied materials in these applications is crucial to minimize any potential adverse effects on ecosystems, human health, and the overall sustainability of the environment. Hence, we have selected the TiO_2 nanoparticles due to its extraordinary photocatalytic activity, non-toxicity, high availability, biocompatibility, and low price.[1] TiO_2 has been utilized for many years as an inert, non-toxic pigment product or other substance evaluated by many regulatory bodies such as the Material Safety Data Sheets (MSDS) and others charged with the responsibility of safeguarding the health of occupational workers and public health safety.[2]

TiO_2 is the advantageous among the variable semiconductors that are being studied from the past few decades for the photocatalytic degradation of various organic pollutants from wastewater due to its band gap, electronic structure, chemical inertness and commercial availability. To make it suitable for visible light activity, many attempts have been made to alter the electronic structure of TiO_2 to conquer the disadvantages of large bandgap energy and high electron-hole recombination rate. The recent literature findings reported that transition metal ion doping into TiO_2 crystal lattice had overcome the above drawbacks and appreciably enhanced its visible light activity.[3-5] The interaction of transition metal ion dopant's 3d or 4d states with the Ti 3d states results in an additional energy level below the conduction band of TiO_2, which significantly

Abstract

Phycoremediation is a promising technique that utilizes algae to remove pollutants from wastewater, soil, and air. The process involves the ability of microalgae to absorb and metabolize nutrients and other organic compounds present in the environment. In recent years, there has been a growing interest in the use of microalgae for the treatment of industrial effluents, domestic wastewater, and agricultural runoff. There are several types of algae that can be used for phycoremediation, including microalgae and macroalgae such as Chlorella, Scenedesmus, Spirulina and Ulva. Each type of algae has its own set of advantages and disadvantages, depending on the specific pollutant being targeted and the environmental conditions. This review discusses the mechanisms, applications and advantages of phycoremediation, as well as its future challenges.

Keywords: Phycoremediation, pollutants, industrial effluents, microalgae and macroalgae.

Introduction

Phycoremediation is a process that uses algae or other photosynthetic organisms to clean up contaminated water or soil by removing pollutants such as heavy metals, organic compounds, and nutrients. This technique has gained attention as a cost-effective and environmentally-friendly alternative to traditional methods of remediation.(Singh et al., 2021)

Algae and other photosynthetic organisms are able to remove pollutants through several mechanisms, including uptake by the cell membrane, absorption by the cell wall, and accumulation in the cellular compartment. Phycoremediation can be carried out in both natural and artificial environments, such as ponds, lakes, and wastewater treatment plants.(Banerjee et.al., 2021)

Several studies have demonstrated the effectiveness of phycoremediation for a variety of contaminants, including nitrogen and phosphorus from agricultural runoff, heavy metals from industrial wastewater, and organic compounds from municipal wastewater. Some of the advantages of phycoremediation include its low energy requirements, scalability, and potential for the production of value-added products such as biofuels and animal feed.(Wani et al., 2020)

Phycoremediation is a promising technique that has several applications in the fields of wastewater treatment, soil remediation, and air pollution control. Algae have great potential in phycoremediation and can be used to clean up environmental pollutants in a sustainable and cost-effective way. Phycoremediation shows great promise as a sustainable

Whereas, Government Degree & PG College, Puttur, Chittoor Dist., A.P. is an educational institution affiliated to S. V. University, Tirupati, offering UG and PG courses in Chemistry and Glory Pharma Chem India PVT. LTD. Tirupati is an industry that

concerned with Bulk Drugs and Drug Intermediates manufacturing, Research and development of new drugs and improvement on the output of existing products.

Now therefore, the parties hereto have agreed to enter into a Memorandum of Understanding (MoU) considering the long term benefits of sharing the knowledge between the parties and establish a vibrant academic collaboration by undertaking joint activities in their respective fields of Research and other useful activities.

The following mutually benefited points are agreed by and between the parties as described under.

1. Seek mutual advice and support in planning and executing programs promoting excellence in respective areas of research and education.

2. Encourage the researchers and scientists of either parties to deliver the research outputs in the form of talks and lectures.

3. Encourage students/ research personnel of either institute to attend lectures, seminars, workshops and conferences in the respective areas of interest.

4. Share the library and scientific literature facilities mutually by giving access to library and other resources of either institute to the students/ researchers of other institute.

5. Encourage faculty members & post graduate and undergraduate students of the Department of Chemistry of Government Degree College, Puttur and scientific staff of Glory Pharma Chem India Pvt. Ltd., Tirupati to have mutual visits for short duration for getting research inputs and guidance.

6. Encourage the employment opportunities in the Glory Pharma Chem India Pvt. Ltd., Tirupati to the students of Govt. degree & PG College, Puttur who are having good academic record and conduct.

The Parties may disclose certain confidential information to the other in relation to any future proposal made under this MoU. Each Party therefore agrees that the contents of this MoU and the negotiations in relation to any future proposal remain strictly confidential.

Subject: Tally Campus Connect Program orientation session on 25/11/22 at Govt. Degree College, Puttur.

Respected Sir,

Tally Education Private Limited (TEPL), the educational division of Tally Solutions, India's leading business management software product company, proposes to collaborate with your esteemed college to train and certify students on Tally.

TEPL is the only entity authorized to issue certifications on Tally. Tally Training and Assessment Centers (TACs) are a network of empanelled centers with TEPL to offer these certifications and associated training support. Our GURUKRUPA IT TRAINING CENTRE, PUTTUR is an empaneled institute with Tally Education. With your kind permission tomorrow (25/11/22) we are going to conduct Tally Campus Connect Program orientation session at your college campus.

Thanking you sir.

Yours sincerely,

## 13. INSTITUTIONAL LEVEL MECHANISM FOR FEEDBACK FORM

The institution 'IQAC' established the feedback process, beginning with receiving feedback from diverse stakeholders using a structured rating-based feedback form for continual curriculum improvement. The College strives to provide students with the greatest possible learning environment in order to empower them to achieve their full potential. Feedback provides students with the opportunity to comprehend many areas of the programme and rate their degree of satisfaction. With these useful suggestions, IQAC submits a report for further curriculum enhancement, which can be forwarded to various faculty members for consideration at the Board of Studies meeting.

Feedback is collected from all the stake holders including students, teachers, Alumni, Parents and employers. The feedback from on the institutions' performance was obtained through the Structured Questionnaire which included 20 questions on various aspects of the institutions' performance and suggestions for further improvement. Students are given the below-mentioned questionnaire through Google Forms. Their responses were collected in the Excel sheet. These responses were analyzed in the form of a graphical representation

2.2.1. IMPLEMENTATION OF MENTOR MENTEE INTERACTION

➢ One-to-one mentoring through a mentor-mentee program is organized once in a month for students of the college.

➢ The mentor establishes a continuous communication channel with the parents of these students so that they are morally supported to perform better.

➢ The mentors and teachers give them extra time beyond contact hours in small groups.

Responsibilities of mentor for the benefit of the students:

➢ Meet the group of students at least once a month.

➢ Continuously monitor the attendance of students to their respective classes.

➢ Continuously monitor, counsel, guide, and motivate the students in all academic matters.

➢ Advise students regarding choice of electives, community service projects, internships, etc.

➢ Interact and advise students in their career development.

➢ Maintain rapport with the students even after their graduation.

➢ Maintain a detailed progressive record of the student.

➢ Contact parents of the students if any academic irregularities, negative behavioral changes, etc are observed.

2.2.2. ESTABLISHMENT OF COMPETETIVE CIRCLE FOR PG ENTRANCE AND OTHER COMPETETETIVE EXAMINATIONS

PG entrance coaching in our college typically involves specialized programs designed to help students prepare for postgraduate entrance exams. These coaching programs often include Subject specific coaching, supply of study materials, conducting of mock tests and doubt clearing sessions. We have established a competitive circle cell under the supervision of Career and Guidance cell to monitor the coaching. For this academic year, the cell was inaugurated on 22/12/2023.

BEST PRACTICE I: WATER QUALITY ANALYSIS

1. Title of the Practice: Water Quality Analysis

2. Objective of the Practice:

The objectives of the said activity/practice are

- To encourage the students to participate in the group activities so that they would learn to deal or interact with their surrounding people effectively and get their work done.

- To inculcate the habit of research so that more students would be attracted towards research there by laying foundation for the development of the country.

- To bring awareness among the students about their social responsibilities and to encourage the students to actively participate in social service activities

3. The Context:

Quality water is quite essential for the healthy society. Hence, the students are asked to analyse water for its quality and encouraged to educate the public about quality parameters of water and ill effects of consuming impure water as a part of social responsibility/ social service. This activity is being organised by Department of Chemistry. Students are encouraged to utilise the facilities and instruments available in the Chemistry laboratories for the analysis of water samples brought selectively from various villages/towns. Sometimes, students are encouraged to take help from surrounding Mineral water Plants for the analysis of water

4. The Practice:

Step 1: Display of Schedule

- Students (III BSc) were divided in to four groups. The lists of students in all groups were displayed on the notice board
- The details of villages/municipalities for water sample collection, schedule of the programme were displayed. Puttur municipality was chosen for the analysis.
- Dates for analysis in the chemistry lab and dates of visiting mineral water plant were also displayed
- Students were advised to note down the details

Step 2: Work done by students

- On 30.11.2019, visited various parts of Puttur town for collecting water samples. Collected water samples from GDC, Puttur (bore water), NGO Colony(bore water), Bus stand area (bore water), Gate Puttur (bore water), Municipal water collected from tap.
- Students were given demonstration to use the instrument Deep-vision Digital water and soil analysis kit model-161 using which TDS, total hardness and pH can be measured
- Students were given demonstration to do chemical analysis for nitrates and sulphates
- Each group analysed water sample from one area using the kit and chemical methods and collected the data
- Students also visited library and used internet for the optimum levels of these parameters and drew conclusions on the quality of water of various areas of Puttur town

- As a part of this analysis, to get better idea on the analysis process, students also visited **'SWARNA WATER PLANT'** located in the town on 23.03.2022

Step 3: Motivation

- Students were motivated in the following way. They were explained about the ill effects of consuming impure water. They were given details about the types of diseases people are prone to get by using impure water and annual death cases in India and in the entire world. Hence, water quality analysis is a very important task to be done for saving health and lives of the public.

5. Evidence of Success:

- Students enthusiastically participated in the entire analysis process indicating that they were truly inspired by the objectives of the process
- Students developed the concept of cooperative learning i.e. learning from one another among themselves
- Students reported the analysis results accurately by performing analysis on their own
- Students enlightened the public regarding the quality of water they are consuming and plausible ill effects

6. Problems encountered and Resources required:

- Few students encountered the difficulties in handling the instruments, later adjusted themselves
- Some students faced difficulties in finding the data related to water analysis from internet indicating that they are not used to handling computers and browsing process
- Reference books, few systems with net facility
- Instruments and chemicals for analysis
